Present innovation in technology
leadership and transaction processing

Corporate Challenge

Evertec, a leading technology and electronic transactions company, provides professional services in three main segments: Acquisition of merchants, payment processing and business solutions. It is the largest debit network operation in the Caribbean, offering its customers who have operations in different geographical areas, an integrated technology solution that allows them to manage their business as a single company. They capture and analyze data throughout the transaction processing value chain, providing valuable services added throughout the processing chain. It is a leading company in technology and transaction processing.

With the aim of maintaining a quality service and with the accelerated conditions of growth and development of new services, Evertec requests SMX Services & Consulting a wide range of professional IT services, including the management of complete development team services, as well as individual consultants to participate in all aspects of the analysis, design, programming and implementation of the System, in outsourcing, which allow it to grow with the agility and excellence.
